

INNOVATION LEADS THE WAY FOR FUTURE DEMANDS

AND YOU ARE THE RIGHT SOLUTION

IMMEDIATE

MAINTENANCE TECHNICIAN (m/f/d)

The foundation of Seifert Systems was laid in 1965, when engineer Rolf Seifert recognised the need to keep electronics in an industrial environment at a uniformly low temperature level and to safely dissipate any heat loss that occurs.

With the experience of more than 55 years, Seifert Systems has grown into a group of companies with its own subsidiaries in Malta, Switzerland, Italy, USA and Australia. Long-standing partnerships enable us to operate successfully worldwide.

The candidate should ideally hold a recognised qualification in Electrical /Mechanical Engineering at Level 4 or higher.

JOB RESPONSIBILITIES AND DAILY TASKS:

- Assist and support Production Machinery repairs,
- Installations and upgrades and related work

REQUIREMENTS:

- Electrical/Mechanical Engineering Diploma (MQF level 4 or higher)
- Proficient Computer user with knowledge of Microsoft applications.
- Good knowledge of English language (both spoken and written)
- Knowledge of Italian and or German languages would be considered as assets.
- Able to work independently or in a team
- Flexible on work hours
- Be able to support in On-Call support
- Minimum of 3 years' experience in an industrial environment, preferably Manufacturing/ engineering;
- Knowledge of ACAD , INVentor or other design software would be considered as asset.
- Good communication skills

Application should include a covering letter together with an updated CV and to be sent by email:
