

INNOVATION LEADS THE WAY FOR FUTURE DEMANDS

AND YOU ARE THE RIGHT SOLUTION

IMMEDIATE MACHINE SETTERS (m/f/d)

The foundation of Seifert Systems was laid in 1965, when engineer Rolf Seifert recognised the need to keep electronics in an industrial environment at a uniformly low temperature level and to safely dissipate any heat loss that occurs.

With the experience of more than 55 years, Seifert Systems has grown into a group of companies with its own subsidiaries in Malta, Switzerland, Italy, USA and Australia. Long-standing partnerships enable us to operate successfully worldwide.

We are currently seeking to fill vacancies for Machine Setters to set and operate our Injection Moulding Machines within the Injection Department in our plant in Malta.

JOB RESPONSIBILITIES AND DAILY TASKS:

- Operate and carry out mould changes on plastic injection machines
- Fault finding on machines
- Change plastic material, set and operate material driers
- Ensure efficient operation of machines

REQUIREMENTS:

- Previous experience in operating and setting plastic injection machines
- Good knowledge of the various polymers
- Good knowledge of processing a wide range of polymers and packing solutions
- Have a positive attitude towards quality, safety, and continuous improvement
- Be an excellent communicator and a team player
- Be computer literate with working knowledge of MS Applications – Excel, Word, Email.
- Willing to Work on 2 shift bases and with possibilities to work on 3 shift.

**Application should include a covering letter together with an updated CV and to be sent by email:
Applications for this vacancy would be considered until 31st October 2021.**
