

# INNOVATION LEADS THE WAY FOR FUTURE DEMANDS

AND YOU ARE THE RIGHT SOLUTION

## IMMEDIATELY TECHNICAL TEAM LEADER (m/f/d)

The foundation of Seifert Systems was laid in 1965, when engineer Rolf Seifert recognised the need to keep electronics in an industrial environment at a uniformly low temperature level and to safely dissipate any heat loss that occurs.

With the experience of more than 55 years, Seifert Systems has grown into a group of companies with its own subsidiaries in Malta, Switzerland, Italy, USA and Australia. Long-standing partnerships enable us to operate successfully worldwide.

The Technical Team Leader (TTL) will be responsible for the operation of the Production Line under the standards of an Industry 4.0 production facility. This involves the supervision and direction of operators to ensure a smooth production flow at all stages ensuring compliance with the Quality, 5S, and digitization standards set by the Company.

### THE TECHNICAL TEAM LEADER WOULD BE EXPECTED TO:

- Be a highly motivated person who can maintain discipline and instill motivation for effective teamworking;
- Be an organized person with a positive attitude and a practical problem solver;
- Possess excellent communications skills with a good command of the English Language, both oral and written. Knowledge of Maltese and Italian languages would be considered as assets.
- Possess a recognized Engineering Qualification at MQF/EQF Level 4 or higher or equivalent
- Good working knowledge of MS applications including Word and Excel.

### THE TECHNICAL TEAM LEADER'S PERFORMANCE WOULD BE GAUGED AGAINST THE FOLLOWING KPIS:

- Daily line Performance vs. Targets
- Internal (NCP) and External (ASQM) quality measures
- Total Quantity of WIP material
- Compliance with digitization initiatives
- Results from 5S and Lean audits

Application should include a covering letter together with an updated CV and to be sent by email until **Friday, 29th October 2021**.
